

# ThermaDoor™ Garage Door Insulation

IS YOUR GARAGE STINKING HOT IN THE SUMMER AND FREEZING COLD IN THE WINTER?

DID YOU KNOW THAT THE TEMPERATURE WITHIN YOUR GARAGE DRAMATICALLY IMPACTS YOUR HOME AND YOUR ENERGY BILLS?

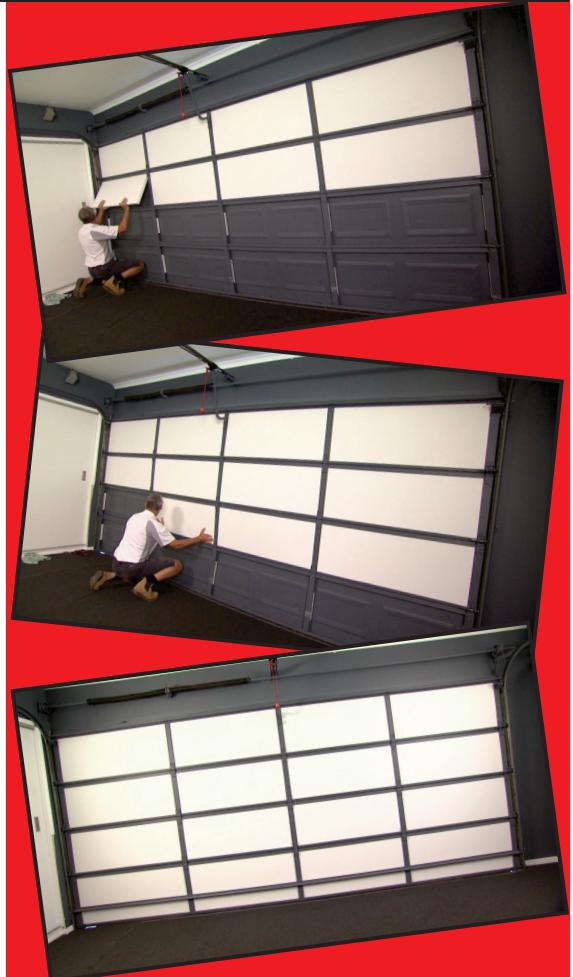

Proudly Australian owned and manufactured, ThermaDoor™ is a construction grade expanded polystyrene (EPS) panel, laminated with an impact resilient, easy to clean vinyl finish. ThermaDoor™ Garage Door Insulation has been specifically designed to fit inside the panel of your new or existing sectional garage door.

With a thermal value of R1.47, ThermaDoor Garage Door Insulation minimises the effects of our harsh Australian climate, by reducing heat loss and heat gain transferring through your metal sectional garage door.

By simply adding ThermaDoor™ Garage Door Insulation to your garage door, you will increase the thermal comfort of your garage, reduce your energy bills, and provide an additional barrier against noise, creating a TRUE and COST EFFECTIVE extension of your home!

## Benefits of ThermaDoor Garage Door Insulation

- Completes the insulation envelope of your home
- Thermal insulation value of R1.47
- Can reduce the temperature by up to 10 degrees in your garage
- Cut energy costs by reducing thermal exchange in your home
- Light weight and impact resilient with laminated vinyl finish
